

Mud Kitchen

Materials:

- 2- 3 wooden pallets 1200 x 800mm
- 3 lengths of wooden planks untreated 1200 x 22 x 100mm
- Assorted wood screws
- Drill
- Crowbar
- Saw
- Paint
- Sink/bowl

Instructions:

- Plan the design: Decide on the size and shape of your mud kitchen. A simple design can consist of two wooden pallets and a few planks of wood to create a work surface.
- Cut the wood: Using a saw, cut the wood planks to the desired length for the sides, top, and bottom of the mud kitchen
- Assemble the frame: Using screws and a drill, assemble the wood planks into a frame. Make sure to leave space for the work surface and the sink/bowl.
- Add the work surface: Cut a piece of wood to fit the top of the frame and attach it with screws.
- Add a sink/bowl: You can use an old sink or bowl to add a water feature to your mud kitchen. Attach it to the work surface and connect a hose for water supply.
- Paint: If you want to add a touch of color or protect your mud kitchen from the elements, you can paint it.
